2022 BUYERS GUIDE FOR CORRECTIONS

THE LEADER IN CORRECTIONAL KITCHEN EQUIPMENT AND SUPPLIES

TO ORDER 800-956-5571 FAX 800-956-6822 WEBSITE COOKSCORRECTIONAL.COM

// Cook's was founded on the idea of providing the right equipment to jails and prisons //

Dear Friends,

Its hard to believe that this Buyers Guide is the 25th anniversary of the first catalog. Cook's was founded on the idea of providing the right equipment to jails and prisons. Twenty five years ago, many facilities were buying light duty, restaurant equipment and we set out to change that. Today, we not only sell the best equipment for corrections, we have a full line of trays and other specialty correctional products that we've developed. These products are designed to make you more efficient, reduce costs, and keep the staff/inmates safer.

Post-covid, so many things have changed but Cook's remains steadfast in providing our correctional customers the best products and service possible. Our team of correctional foodservice experts is always standing by to help in any way they can.

Warm Regards,

Jeff Breeden

CEO

Warrenville, IL 60555

3. Ordering is fast
Call 800-956-5571 and your call will be immediately directed to customer service. The average phone order takes only minutes to complete and you'll be on your way with a smile to boot!

4. Shipping in 24 hours or less
Most in-stock orders ship within 24 hours, if not the same day you order (excluding drop ships).

5. Pay with plastic
We accept VISA, MasterCard and Discover.

6. Free expertise
Our Sales Staff and Customer Service teams are ready to answer your toughest questions fast! They'll answer 98% of your questions on the spot and all of them within 24 hours.

7. Recurring orders and automatic shipments
Regulate your inventory by setting up an Automatic Recurring Order. We'll ship to you on a predetermined schedule of your choosing.

8. Special bids and quotes
We'll help you save money on large quantities or equipment orders. Our Bid Department will prepare special bids and quotes for you. FREE – and Fast!

9. No minimum order
Order as much as you like or as little as you need. From one item to a full truckload, we're happy to handle orders of any size.

10. Free samples
We'll send you a free sample of many of our products, including any of the Cook's Brand Trays like Flex, Sentry or any insulated style. You can also test out our Portion Control Servers, FSE textiles, even our money saving disposables, so you can try before you buy.

11. Monthly Sales Promotions
Make sure we have your email address! Our sales team has monthly promotions on the products you use most including trays, disposables, kettle tools and more.

12. Check out our social side!
Interact with us and other correctional foodservice professionals like yourself on Facebook (Cook's Correctional page) and LinkedIn (Cook's Correctional page).

13. 24/7 access at cookscorrectional.com
Save with our email promotions, place an order first thing in your morning, or watch a product demonstration video, cookscorrectional.com is always open.

14. Solutions designed for YOU!
Inside this catalog you'll find products carefully selected for you to solve your security issues ensuring a safe environment for your officers and staff, to solve your meal delivery challenges and to solve your budget woes and stretch your dollar even further than before. And if you don't find it in here – call us, we're eager to help solve your toughest problems!

CORRECTIONAL

THE LARGEST SELECTION OF INSULATED TRAYS

With a variety of configurations, you'll find the right tray to fit your menu.

The right fit for your facility

Thinking of changing trays? Start by evaluating your menu including the number of items you serve and the portion size of each. Is there a compartment for bread? Next, consider if a flatware compartment or condiment compartment is necessary. Some trays stack both ways, others in one direction only. Lastly, consider if multiple colors are required for special diets or "seg" trays.

KEY FEATURES

2 Year Warranty – Full replacement warranty against manufacturing defects. No questions asked.

One Piece Construction – No seams or holes in these trays, so they won't get water logged or split from inmate abuse

Extremely Durable – Thick exterior skin and foam insulation to reinforce their shape so you won't have corners that dent and sides that crack-even in the roughest of environments.

Maximum Heat Retention – Hot stays hot and cold stays cold! We engineered the insulation density to deliver the optimal temperature retention during your meal delivery.

Immediate Availability – You won't have to wait for trays, because we carry a significant inventory of our best selling trays so even large quantity orders will ship out the same day.

COOK'S BRAND

4 & 5 COMPARTMENT GATOR TRAY™

This long-lasting insulated tray was designed with input from correctional professionals like you! The Gator Tray offers improved durability, heat retention and functionality with the traditional four compartment design.

- **Four Compartment Layout** – accommodates a 6 oz side and 12 to 16 oz entree or side. Stackable withe the 5 compartment Gator Tray
- **Five Compartment Layout**– a ¾ height divider in one large compartment to separate bread from other food keeping the bread dry and fresh. Stackable with the 4 compartment Gator Tray
- **One Piece Construction** – no seams to split or crack
- **Increased Durability** – 25% thicker skin than other trays on the market
- **Better Design** – trays seal tighter because of Cook's two step design. Top and bottom surfaces nest securely so trays will be flat and stack up straight improving heat retention of meals and food safety
- **Immediate Availability** – Even large quantity orders can ship out same day
- 2 year **"No Questions Asked"** replacement warranty against manufacturing defects
- 10 per case

GORILLA TRAY

This durable six compartment insulated tray boasts an impact resistant outside shell with interior foam insulation that enhances the rigidity of the tray as well as temperature retention. Additionally, the highly durable special blend of copolymer plastic used for all Cook's Brand insulated trays is stain resistant and won't retain odors. Both versions of the Gorilla Tray feature the following benefits:

- **One-piece Design –** no seams to split or crack
- **Incredibly durable –** thick skin reinforced with foam insulation means this tray will last a long time
- **Versatile –** six compartments and a flatware slot, this tray stacks with Jones Zylon Guardian II Tray
- **Immediate Availability –** in stock and ships same day
- 10 per case
- 2-year "No Questions Asked" full replacement warranty against manufacturing defects

Tray – 14-½"L x 11"W x 2-¼"D
Lid – 14-½"L x 11"W x 1"D

PORTIONS LOOK LARGER

COOK'S BRAND

RAISED COMPARTMENT GORILLA TRAY

Elevating the food in the compartments of the Raised Compartment Gorilla Tray makes portions appear bigger and more fulfilling. We've raised the bottom of the tray compartments to make them shallower than the original Gorilla tray. We've also made these trays 2-⅜"D allowing the underside of the compartments to be larger so food won't stick to the bottom of the tray above when stacked.

Tray – 14-½"L x 11"W x 2-⅜"D

COOK'S BRAND

GODZILLA TRAY

Constructed to endure the abuse that regularly occurs in jails and prisons, these trays have a thick exterior skin and reinforced center seam.

- **Maximum Heat Retention** – Innovative foam injection ensures optimal insulation density for maximum heat retention
- **Large Capacity** – six compartment layout accommodates larger or more varied menus
- **Versatile** – tray stacks with Jones Zylon Guardian tray
- **Exceptional Durability** – one piece design with reinforced seam and extra thick skin means these trays resist splits, cracking and denting at the corners
- 2 year "**No Questions Asked**" full replacement warranty against manufacturing defects
- 10 per case

FLEX TRAYS BEND BUT WON'T BREAK

Flex Trays CANNOT be sharpened into a weapon

MADE FOR CORRECTIONS

Revolutionary Design

Created in response to the need for high security, long life and ease of cleaning.

- **Increased Security** – The natural flexibility of silicone prevents it from being sharpened into a weapon
- **Extremely Durable** – Silicone will not chip, crack and cannot be broken. Designed to stand up to inmate abuse, hot ovens and harsh chemicals in dish machines.
- **Easy to Clean** – Silicone is naturally non-stick. With no cracks or crevices in the design, the tray is easy to clean regardless of the cleaning method.

PROBLEM SOLVED

PROBLEM

Inmates shatter trays to sharpen broken shards of hard plastic into shanks.

SOLUTION

You know those silicone baking pans? They're popular because they're easy to clean and being flexible they take up less space. The flexibility got us thinking and customer feedback got us going. With some manufacturing expertise, and a little trial and error, we created a meal delivery tray rigid enough that the contents don't spill out even when fully loaded, yet the flexible silicone is so soft it can't be shattered or sharpened into a weapon, ever....problem solved!

KEY FEATURES

- FDA approved silicone, meets NSF/ANSI Standard 36 for direct food contact, NSF Approved
- Temperature rating of -40° to 446° F
- Great for heated carts, retherm ovens and freezers
- Reinforced design features ribs and support bands that make the tray extremely stable
- Tray has lightly textured surface to aid in sanitizing
- Silicone material will not retain odors or flavors

COOK'S BRAND

FLEX TRAY 447SS

Four Compartment Stacking Tray

This four compartment self-stacking flex tray is the ideal solution for facilities that want to improve safety in their meal delivery but have a menu and process built around a traditional four compartment insulated tray. The self-stacking design seals compartments to keep hot air inside and cooler outside air out improving temperature retention of your meals, giving you excellent functionality. And like all Flex trays, this tray can can't be sharpened into a weapon for exceptional safety in meal delivery.

- Constructed of FDA approved silicone, meets NSF/ANSI standard 36 for direct food contact
- Silicone material is naturally non-stick, stain and odor resistant making it easy to keep clean
- Reinforced design features ribs and support bands to stabilize the tray even when held on one side
- Tray can go from oven to inmate, with temperature rating: -40° to 446°F
- Provides outstanding performance in heated carts, retherm ovens and freezers
- Maximum compartment capacities: (2) 21 oz and (2) 9-¾ oz
- 2 year warranty against manufacturing defects
- 10 per case

DESIGNED TO STACK

COOK'S BRAND

FLEX TRAY 626SS

Six Compartment Stacking Tray

If security and heat retention are priorities for you, then this six compartment Flex Tray is your tray of choice! With temperature holding capabilities similar to other insulated trays and flexible material that can't be sharpened into a weapon, you can't beat this tray for security and functionality. These trays even stack like insulated trays.

- Constructed of FDA approved silicone, meets NSF/ANSI Standard 36 for direct food contact
- Appropriate for use from oven to inmate! Temperature rating: -40° to 446°F
- Provides outstanding performance in heated carts, retherm ovens and freezers
- Design features ribs and support bands that make the tray extremely stable
- Maximum compartment capacities: 22 oz, 18 oz, (3) 11 oz and flatware compartment
- 2 year warranty against manufacturing defects
- 10 per case

FLEX TRAY 335 & 437

Large Compartment Trays

These trays easily hold an entire meal or accommodate menus with large portion sizes and ensure the security of inmates and officers alike in the kitchen. With the Flex Tray series from Cooks, it is virtually impossible to make a sharp weapon from the tray. This three compartment tray is ideal for retherming or transporting in a heated cabinet, and with its natural non-stick surface, even the toughest stuck on foods will wash off easily.

- Model 437 includes a flatware slot
- Appropriate for use from oven to inmate. Temperature rating of -40° to 446°F
- Constructed of FDA approved silicone, meets NSF/ANSI Standard 36 for direct food contact, NSF Approved
- Reinforced design features ribs and support bands that make the tray stable
- 2 year warranty against manufacturing defects
- 12 per case

COOK'S BRAND

FLEX TRAY 221

Two Compartment Tray

This smaller two compartment flex tray has a larger rectangular compartment along with a large oblong bowl that can easily hold soup or a side. Pair it with the lid for stacking and ease of transport. The temperature safe range of these trays make them ideal to go from freezer or cooler to oven to inmate. And like all Flex trays, this tray can can't be sharpened into a weapon for exceptional safety in meal delivery.

- Constructed of FDA approved silicone, meets NSF/ANSI standard 36 for direct food contact
- Tray can go from oven to inmate, with temperature rating: -40° to 446°F
- Provides outstanding performance in heated carts, retherm ovens and freezers
- Silicone material is naturally non-stick, stain and odor resistant making it easy to keep clean
- Reinforced design features ribs and support bands to stabilize the tray even when held on one side
- Maximum compartment capacities: (1) 16 oz and (1) 8 oz
- 2 year warranty against manufacturing defects
- 24 per case

NATURALLY NON-STICK SILICONE TRAYS FREELY RELEASE FOOD FOR UNRIVALED SANITATION!

CUSTOM COLORS ARE GREAT FOR SEGREGATION UNITS OR SPECIAL DIETS

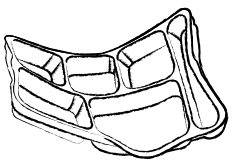

MINIMUM ORDER QUANTITY AND EXTENDED LEAD TIME MAY APPLY

SENTRY SERIES TRAYS

The innovative hybrid plastic used to make these trays won't shatter or crack and can't be sharpened into a weapon. If you're looking to enhance security in your cafeteria setting, the 6-compartment tray is ideal for your needs. The extra-deep tray with a lid will support your meal delivery to a seg unit or other area where you want a safe covered tray to protect food from outside contaminants and improve temperature retention for short transit times.

- Improves security with soft, pliable plastic
- Durable construction
- FDA approved material
- 2-year Warranty against manufacturing defects

PROBLEM SOLVED

PROBLEM

Inmates sharpen hard plastic utensils and trays into shanks.

SOLUTION

We were looking for a food grade plastic that was soft like silicone for our sporks and trays. Working with material engineers, we found just the right plastic...ultra soft, really durable and food safe. Perfect, we thought, this will work great for maximum security facilities, segregation units, other areas where traditional sporks are not appropriate...problem solved!

KEY FEATURES

- **Security** – innovative hybrid plastic won't shatter or crack and can't be sharpened into a weapon
- **Pliable** – pliable material will bend without breaking and will return to it's original shape
- **Performance** – products feature reinforced ribs and support bands to ensure the high quality, durable construction you expect from Cook's Brand products
- **Exceptional Value** – always looking to meet your needs, the Sentry Series from Cook's offers you security in meal serving similar to the Flex but at a lower price point. Ideal for use with heated carts, these trays are temperature rated to 250°F.

COOK'S BRAND

SENTRY SERIES 6 COMPARTMENT TRAY

If you're looking to enhance security in your cafeteria setting then these are the trays for you. The six compartment layout has plenty of room to hold a variety of menu items and includes a separate flatware compartment. The pliable material will not crack or chip, yet it's durable and not easily scratched, so you'll get years of service while improving security.

PROBLEM

Inmate thinks he has food borne illness...hmm, let's see?

PROBLEM SOLVED

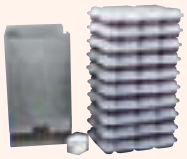

SOLUTION

All facilities store sample meals for three days in the freezer, in case of a food borne illness claims. But storing isn't enough...a system and product that stores, rotates and simplifies the process will make the manager's life easier. Our Sample Tray Box fits neatly into the box and is automatically rotated out after 3 days. Inmate gets sick, meal gets tested, no food borne illness here... problem solved!

Stores up to 3 days. Breakfast, lunch and dinner

OUR MOST DURABLE COPOLYMER FLATWARE

COOK'S BRAND

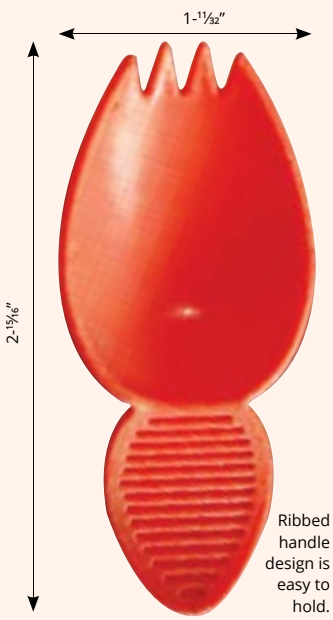

CORRECTIONAL FLATWARE

Designed by Cook's for superior durability, our copolymer flatware provides untouchable economy and a full range of options to meet the flatware needs unique to your facility. We gave this flatware line an extra thick handle and increased the radius of the handle edges for comfortable use. And while it's sturdy enough to stand up to the toughest inmate, the design is attractive enough for your staff dining room.

- Microwave and Dishwasher safe.
- Textured surface to hide scratches and stain resistant
- Maximum heat retention 230°F
- 400 per case
- 1 year "**No Questions Asked**" full replacement warranty

COOK'S BRAND

CORRECTIONAL MINI SPORK

This new Mini Spork features a full sized bowl with a small handle to reduce the potential of an inmate sharpening the spork into a weapon. With its small size, this spork will easily pass through most waste pipes, decreasing the opportunity for inmates to clog plumbing.

- Innovative small design – less than 3" in overall length
- Easy to hold ergonomic handle has a ribbed design to increase strength
- Stain resistant copolymer material is dishwasher safe
- Temperature safe -40° to 248°F
- Easy to see security orange
- 1 year **"No Questions Asked"** full replacement warranty
- 400 per case

MADE FOR CORRECTIONS

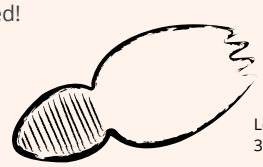

PROBLEM SOLVED

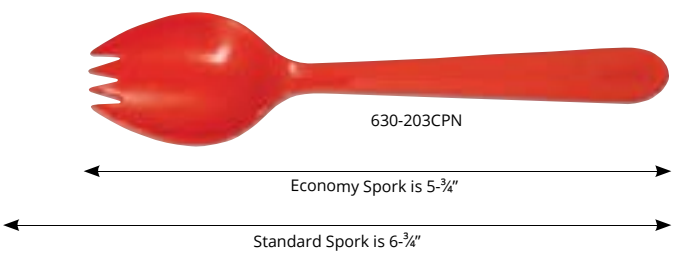

PROBLEM

Inmates are flushing the sporks – no really!

SOLUTION

After 15 years of selling to jails across the country, this was a new one for us. Sporks clog plumbing and leave it to an inmate to discover this. So we needed a small spork that could pass through pipes yet still function as an eating utensil. Using a correctional razor as the example, we developed the Mini-Spork – flushes easily yet you can eat soup with it...problem solved!

Save 20% when you buy the Economy Spork instead of a Standard Sport

PROBLEM

Inmates sharpen hard plastic utensils into shanks.

SOLUTION

It started with a call to Sabic, one of the largest plastics manufacturers in the world. We were looking for a food grade plastic that was soft like silicone for our sporks and trays. Working with material engineers, we found just the right plastic...ultra soft, really durable and food safe. Perfect, we thought, this will work great for maximum security facilities, segregation units, other areas where traditional sporks are not appropriate...problem solved!

Which material is right for your facility?

QUICK TIP

COPOLYMER

Long Lasting – Value Priced

When price is an issue, then our trays, tumblers and mugs made from copolymer plastic are the answer! Designed with the correctional environment in mind, Cook's Brand meal serving products are more rugged than similar products offered on the market. Copolymer products will look good for years to come, making it a great choice for the budget conscious.

SENTRY

High Security - Great Value

Made from innovative hybrid plastic, these pliable trays, tumblers and mugs will bend and fold but won't break. Perfect for the cook/serve kitchen, Sentry Series products are temperature safe to 250°F, making them ideal for use in heated carts and the dish machine. If improving safety in your facility is a priority, the Sentry Series will help you do it at an exceptional value.

FLEX

Maximum Security - High Heat Safe

These trays, bowls and tumblers are made of FDA approved, heat resistant, silicone to be the safest on the market! With a temperature rating of -40° to 446°F, you can take a meal from oven to inmate and never worry about cracking, breaking or being turned into a weapon.

CHOOSE THE MATERIAL THAT BEST FITS YOUR ENVIRONMENT

COOK'S BRAND

SQUAT TUMBLERS FOR CORRECTIONS

Feeding through a food pass? The squat tumbler is made for you. Available in durable copolymer, Sentry Series or Flex, you can choose the material that's best for your operation. The 9 ½ oz. tumbler fits through a 3" food pass and the 12 oz. tumbler will fit through a 4 ½" food pass. These tumblers are also over 3" in diameter, so both sizes are too large to fit into plumbing and cause a clog.

- Custom colors available in all materials
- 48 per case
- 1 year "**No Questions Asked**" against material defects

CORRECTIONAL

What's A Penny Worth?

Just think – if you're feeding 300 inmates and you could reduce the cost of each meal by just 1 penny, you would save $3,285 in food cost.

When you're serving hundreds of meals a day, food costs add up quickly. The easiest way to reduce costs is through portion control - providing inmates proper nutrition but not giving away pennies on every tray! Having the right tools to maintain portion size is a must. Cook's Correctional Dishers and Portion Control Servers are sized for correctional menus and built to stand up to the abuse in jail and prison kitchens.

COOK'S BRAND

RITE-SIZE© ROUND SERVERS

Vivid colors are easy to see to ensure correct portion is being used.

Dish out perfect portions at 2, 3, 4, 6, 8, 10 and 12 oz servings with Rite-Size Servers in bright colors for quick size identification. Made from stain resistant copolymer plastic, these portion utensils are incredibly durable and withstand temperatures up to 190°F. There is a "banger" bump at the base for strength and rigidity when users bang the utensil against a tray or pan to empty out the contents.

- One piece durable copolymer construction
- Capacity is easily visible on server handle
- Product can be hung up on pegs or in tool locker when not in use
- 1 year "**No Questions Asked**" full replacement warranty

COOK'S BRAND

RITE-SIZE© SQUARE SERVERS

Control your food costs!

These unique square servers are the perfect fit for small compartments where a round server is too big. Begin using these on your tray line and you'll see an immediate improvement in sanitation because food will no longer end up outside the tray compartment. You'll also reduce food costs because your staff will no longer dish out a second portion to replace food that spilled during tray assembly.

- 4, 6, 8 and 10 oz sizes, solid and perforated
- One piece, highly durable copolymer construction
- Color-coded and capacity is easily visible on server handle
- Stain resistant and dishwasher safe
- 1 year "**No Questions Asked**" full replacement warranty

PROBLEM SOLVED

PROBLEM

Traditional Spoodles don't work for small tray compartments.

SOLUTION

Design a utensil that delivers food INTO the compartment. After reviewing many trays and correctional menus, we developed a utensil that is deep and square rather than round and shallow. This allowed the food to be deposited directly into the compartment without any waste. Less waste...more sanitary trays...problem solved!

LIFETIME WARRANTY

WARNING: Cancer & Reproductive Harm
www.P65Warnings.ca.gov See p 184 for details

PROBLEM

Standard Portion Control Dishers aren't sized to fit correctional menus.

SOLUTION

Traditionally dishers are sized by the number of scoops per quart but that's now how correctional menus are written. We had a customer who was serving an 8 oz. serving of mashed potatoes and had no accurate way to portion them out. That's where we came in. The first Rite-Size disher had an 8 oz. capacity and we followed with the 4 and 6 oz. sizes to fill out the line....problem solved.

PROBLEM SOLVED

SECURITY KNIVES

Full tang with pre-drilled hole through handle

Providing the highest level of security available, these full tang knives feature a carbon steel blade that extends completely to the end of handle. A small hole in the handle accommodates most tethering systems including the Cook's Knife Leash Kit. Unlike white, polypropylene handled knives, your tethering system will run through the metal providing additional security.

- Full tang blade
- Pre-drilled for tethering
- High quality German stainless steel
- 1 year "**No Questions Asked**" full replacement warranty

Model #		Each
630-833	8" Chef's Knife	$32.99
630-834	10" Chef's Knife	$34.99
630-835	8" Bread Knife	$26.99

COOK'S BRAND

KNIFE LEASH KIT

Tether any knife or tool with ease.

Reduce problems occurring with lost, misplaced or stolen knives in your correctional kitchen with the Knife Leash Kit. The permanently attached security fastener is easily connected to the removable leash, which is then locked to the table. The system is simple, flexible and very secure. Security fasteners also sold separately to secure utensils in the kitchen.

- Attach knives, dishers, peelers and other kitchen tools
- 760 lb tensile strength
- Available with Red, Green or Clear leash
- Kit Includes: Coated 5' leash, numbered security fastener and pick resistant lock
- 1 year Warranty against manufacturing defects

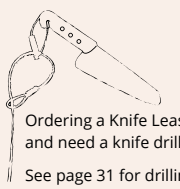

Model #		Length	Each
KLK100-30	Clear	30"	$26.99

KLK100-96	Clear	96"	$26.99

PROBLEM

Missing knife means kitchen lock down.

SOLUTION

The challenge wasn't in finding a way to stop losing knives...the idea of a leash is pretty obvious. And, in fact, many of our customers had already installed home-made leashes. But our solution had to be different...it should not require maintenance to install it and it had to be flexible and super secure. After 18,000+ kits sold, I think we nailed this one...problem solved!

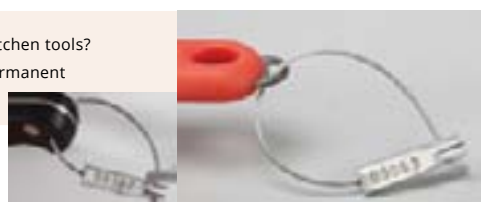

Ordering a Knife Leash and need a knife drilled?

COOK'S BRAND NSF

HIGH SECURITY TOOL LOCKER

Superior Construction

These Tool Lockers use 14 gauge all welded stainless steel construction

Unbreakable Door

⅜" Lexan for the door, it's virtually impossible to break

Secure

The non-removable door fits flush with face of locker and is secured with a 3 point locking device with Master Pro Series pick resistant 6 pin lock. To make this Tool Locker even more secure we've constructed a 270° hinged locking plate made of 12 gauge stainless steel

Storage for all Utensils

The 4" x 3⁄16" Dia. stainless steel welded pins are positioned in three rows with spacing of 10", 13" and 18" that allows you to store all sizes of knives, peelers, spoons, ladles and portion utensils.

Optional Light

Always know when the locker is being used with the bright blue strobe light that flashes every time the door gets opened. Powered by easily replaceable 12 volt battery.

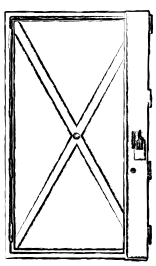

Warranty

1 year warranty against manufacturing defects

PROBLEM

Operators wanted a simpler way to store and secure tools.

PROBLEM SOLVED

SOLUTION

A tool locker isn't a new idea, and many jails have one that maintenance built for them. But when we talked to our customers, what they really needed was an easy way to store their tools, make sure they were all accounted for and then securely locked up when not in use. We designed the Cook's Tool Locker to answer those needs and more. With a reinforced lexan front, you can see everything in the tool locker and the 14 gauge all welded construction and flush front door with three pin lock is designed so it can't be pried open. You'll feel secure when your kitchen tools are stored here.... problem solved.

STATIK BOARD™ CUTTING BOARDS

No need to put a towel under the cutting board to keep it from moving around on the counter. The innovative design of STATIK BOARD™ puts safety first with molded-through, non-slip feet that stop slipping and sliding of your cutting board during use even on wet countertops. Choose from white cutting boards with color coded rubberized sides and storage hook or colored boards with coordinating rubberized sides and storage hook.

- Built-in hook for easy transport and hygienic storage
- Rubberized feet grip flat surfaces; rubberized sides keep the board upright without sliding
- HACCP color-coding system to minimize cross-contact
- Tough board surface reduces knife dulling; durable copolymer prevents warping
- Dishwasher safe

MADE in the USA

HEAVY DUTY SHEET PANS

- Impact-resistant 3000 series aluminum
- Closed bead includes galvanized non-rusting rod for reinforcements
- Tapered design for easy stacking
- Concave bottom flattens out during heating for even heat distribution

Model #		Size	Each
V9001	16 gauge	Full	$23.99
VL-9002	18 gauge	Full	$25.99
VL-9002P	18 gauge	Full/Perforated	$22.99
V5314	13 gauge	Half	$25.99
V5303	18 gauge	Half	$20.99

STAY FLAT SHEET PANS

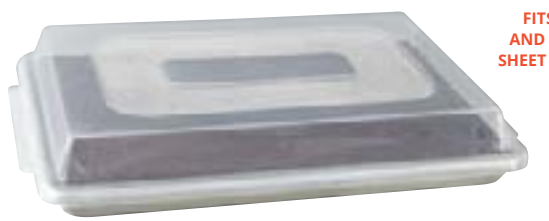

These pans stay put with no bowing! You can also boost sidewall strength by about 30% because these sidewalls have been reinforced with wire.

- Plain cookie sheet style with ¼" wire for added strength
- 50% less oil usage than with bread and cake pans
- Increased durability and reduced staining
- Tension bow technology to increase pan bottom strength and prevent bowing

Dimensions 17-⅞"L x 25-⅞"W x 1"H

Model#		Each
CH-40694	18 gauge	$23.99
CH-40804	16 gauge	$17.99

FITS FULL AND ½ SIZE SHEET PANS.

SHEET PAN COVERS

Easy to use, just snap these on your sheet pan to keep foods fresh and keep contaminates out. You've also made it easy to stack multiple pans without crushing the contents for quick storage.

- The clear material allows for quick visual identification of contents
- Fit full and half size sheet pans

Model #		Each
8109B9	Half Size Sheet Pan Cover	$6.99
8109C9	Full Size Sheet Pan Cover	$8.99

SUPER PAN V® STEAM TABLE PANS AND LIDS

The strongest steam table pans on the market; the Super Pan V has an innovative corner design that is 300% stronger than traditional steam table pans resisting dents even in the roughest of correctional kitchens. Dent free corners ensure that pans fit tightly into your steam tables for a safer, sanitary and more energy efficient operation.

- Heavy-duty 22-guage 300-Series stainless steel construction
- Concave, diaonally tapered corners are impact resistant and act as pouring spout
- Resists dents and dings even in the toughest kitchen
- Easy-to-clean, dishwasher safe
- Fits with all Super Pan II pans, covers and accessories
- Anti-jamming design to prevent pans from sticking together
- Edges are reverse formed, polished and flattened for tight fit and comfort in handling

WRITE DIRECTLY ON LID REDUCES THE NEED FOR LABELS

NSF

HI-HEAT SILICONE FLEX LIDS

Reduce your reliance on disposable products like food wrap or foil by using the Flexsil-lid for food pans. Originally developed to keep foods fresher, longer in steam table pans in cold storage, this cover does just that plus it can even go in the freezer or the oven making it great for retherm. And with the patented "Lip-Lock" design, these covers seal tightly preventing spills and mess.

- Replaces disposable food wrap and foil
- Great for retherm, silicone goes from freezer to oven
- Fits on pans with bent edges
- NSF approved

A Better Way to Clean Insulated Trays

PROBLEM SOLVED

PROBLEM

A standard peg rack only holds three trays and they flop around during washing so they're not always clean.

SOLUTION

Customers needed a better, faster way to clean trays, so that was our goal: a washrack for insulated trays that held the maximum number of trays possible at a position that gets water in all the compartments and trays come out clean. We came up with an easy to install insert kit that holds four trays securely at an angle letting water pass over all the trays. Capacity is up 25% and all trays are clean....problem solved.

WORKS WITH A WIDE VARIETY OF TRAYS

Marathon Tray

Godzilla Tray

GorillaTray

COOK'S BRAND

INSULATED TRAY WASHRACK

Innovative Design only from Cook's

Designed for corrections to provide a better way to clean insulated trays by optimizing the position of trays during the wash cycle.

- Superior Cleaning - engineered so water is deflective into cavities for superior spray coverage
- Can not be easily broken - constructed of durable, break-resistant copolymer material
- All plastic design - no metal parts to be used as a weapon
- Best value - can be retrofitted to existing Carlisle DR100RF washrack

19-¾" W x 19-¾" L x 3-½" H

Secure From Inmate Contamination

PROBLEM SOLVED

PROBLEM

Inmates tamper with the beverage servers during transport.

SOLUTION

An unwatched beverage server is just a problem waiting to happen, but no matter how hard you try, you can't be everywhere all the time, especially when transporting food. That's why we came up with the Beverage Server Lock. It slides on easily, locks securely and the heavy duty, all-welded stainless steel keeps lids in place and inmates out of the juice, even if the latches on your beverage server are broken or missing....problem solved!

PROBLEM SOLVED

PROBLEM
Broken shelves from inmate abuse.

SOLUTION
Many of the facilities we visited had broken shelves on their tray delivery carts. The Food Service Managers explained to us that it's usually from inmates sitting or standing on the shelves. Upon closer inspection, we realized most carts didn't have any reinforcement under the shelves. Who ever thought 350 lb guy would sit on it? So our solution was pretty simple, reinforce the front of the shelf with welded, square tube. Reinforced frame, no more broken shelves... problem solved!

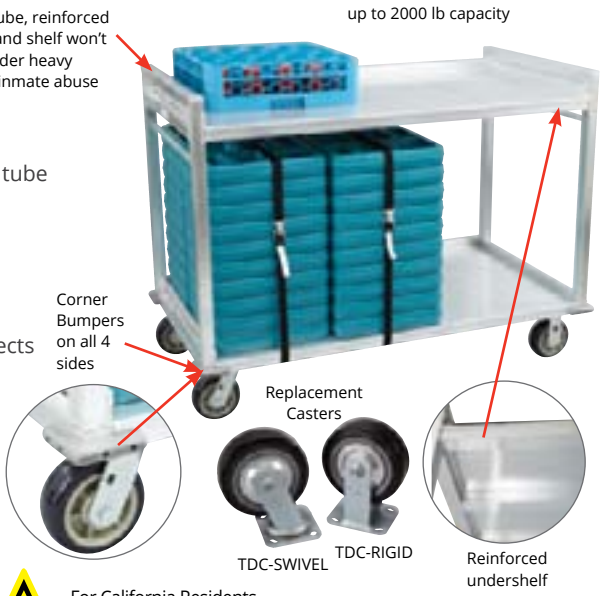

COOK'S BRAND

ALUMINUM TRAY DELIVERY CART

THE RHINO CART

The Best Transport Solution for Marathon, Gorilla, Grizzly and Gator Trays

▼ RHINO 630-G-84
HOLDS GATOR TRAYS

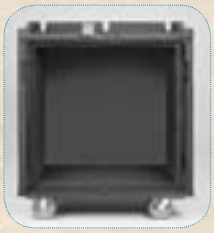

LARGE CAPACITY

The M-150 holds 150 Marathon Trays or 120 Gorilla Trays. The M-102 holds 102 Marathon Trays or 84 Gorilla Trays. The G-84 holds 84 Gator or Grizzly Trays.

BASE WON'T FLEX

A Reinforced metal base supports the cabinet stabilizing the Rhino, also providing metal to metal caster mounts that won't get stripped.

EASY TO LOAD

No center support needed, giving you open access to the inside. Doors open 260 degrees for clear access to load, unload and clean.

SECURE TRANSPORT

For security, Rhino has a locking latch, but even without a lock the Rhino doors won't open during transport because of the latch design.

DEPENDABLE ROLLING

Rhino's 8"casters have sealed stainless steel precision bearings and components for long life even in wet conditions or rough terrain.

COOK'S RHINO CART SERIES

Insulated Polyethylene Tray Delivery Cart

Designed with input from our customers, this cart has everything you could want in a one-piece, highly durable plastic tray delivery cart at an exceptional value.

- Fully insulated body provides increased strength to cart
- Superior insulation and door seal ensure exceptional temperature retention
- Molded in door handles will never break
- Metal reinforced base delivers rigid support to entire cart, no sagging in the middle
- Doors open completely (263°) making loading and unloading easy
- Easy to clean smooth interior surfaces
- Top and bottom rubber bumpers available upon request
- Tow package options available
- Height appropriate ergonomic handles on all four sides for easy pushing
- Raised rail on three sides of top prevents item from slipping off cart
- Sloped top (2°) makes for easy cleaning and allows water to drain
- Opening on top rail lets you use straps to secure beverage servers or dish racks
- Lockable, stainless steel maxi-latch prevents doors from opening during transport
- 8" Colson Performa©® casters feature a sealed bearing and are rated to carry 2000 lbs.
- 1 year Warranty against manufacturing defects

Lockable Latch secures contents from inmate tampering

ENCLOSED DELIVERY CART

Non-heated design is ideal for insulated trays

This new stainless steel fully enclosed, heavy-duty prisoner tray transport is designed to hold, transport, and serve insulated trays. It can easily be loaded ahead of time to be transported to the serving location. "Correctional Quality" construction is built to withstand the demanding requirements of jail or prison facilities.

- All stainless steel heliarc welded, single unit construction that is sturdy, balanced, and stable during transport
- 6" cart-wash quiet casters, two rigid, two swivel with brake
- 1" square heavy gauge welded tubular base frame
- Full extension solid 1 ½" wide continuous bumper
- Two compartments each with a heavy-duty stainless steel welded shelf that can hold thirty-two 13"x14" Cook's Gator Insulated Trays, sixty-four trays total
- Heavy duty hinges keep doors aligned and hold up to inmate abuse
- One year parts, 6 month limited labor warranty
- Casters are attached to a reinforced plate which distributes weight evenly resulting in longer caster life

Model #		Capacity	Each

HEATED TRAY DELIVERY CART

Available with or without heated component and supplied with a reinforced fixed shelf.

Call us today **800-956-5571**

With consistent food temperature as our goal, we engineered this cart with a thermal column design that promotes air circulation to ensure a consistent temperature throughout the cart. We've built in the features our customers ask for the most:

- All stainless steel construction
- All shelves are reinforced with ¾" x ¾" stainless steel tubing
- Top mounted convected air heating system, reduces opportunity for damage during inmate cleaning
- Flush mounted door with 270°swing for unobstructed access to trays
- Door(s) have three 12 gauge fully welded hinges for longevity
- Lighted on/off switch with recessed controls
- Recessed tamper proof thermostat and Lexan covered thermometer
- Security fasteners throughout
- 12 gauge cord wrap and power cord
- Welded handle mounted to unit for easy maneuverability
- 1 year warranty against manufacturing defects

NOW SHEET PANS & TRAYS DRY FASTER

COOK'S BRAND

VENTED SHEET PAN & TRAY DRYING RACK

Choose a Sheet Pan Insert or Insulated Tray Insert

We've re-engineered our vented tray drying rack and added a second insert made for sheet pans. Shelves are now 20" apart and the new sheet pan insert has six slots with 2" spacing. We continue to offer the insulated tray insert with four slots at 3" spacing. Customers using the rack to dry sheet pans or cafeteria trays can order this rack with the new sheet pan insert and they will get a 50% increase in capacity from what they would have had with the original insert. And with either rack, you the durability and ruggedness you expect from a Cook's Brand product.

- 1-½" all welded square tube construction for long life
- Removable break resistant polycarbonate inserts are dishwasher safe for improved sanitation
- Vented sides and bottom of inserts promote faster evaporation and drying
- 6" Plate casters welded to frame
- Optional drip tray to reduce water that pools on floor
- 1-year warranty against manufacturing defects

Two rack sizes:
78"W x 29-¾"D x 75-¼"H spacing between shelves is 20"

EXTRA HEAVY DUTY TRAY DRYING RACK

The best tray drying rack just got better.

Built for corrections, this extra heavy duty tray drying rack is constructed from aluminum with reinforced shelves, a rugged frame and heavy-duty, easy-to-roll casters. Now with a perimeter bumper, handles and added tray capacity, these are the best tray drying racks in the industry. Models available for insulated trays or cafeteria trays.

- All welded units with 1-½" x 2" x .090" upright and cross braces
- Top is ⅛" solid aluminum sheet
- All guides are .090 thick and radiused for safety
- 1" Bumper surrounds entire base perimeter to protect cart and walls
- Two handles built into the design improve steering
- 6" x 2" polyurethane casters, all swivel
- ½" x 1" Heavy duty center support between shelves
- 3000 lb weight load
- 1 year warranty against manufacturing defects

NEWAGE INDUSTRIAL

HOT/COLD TRAY DRYING RACK

Engineered by Cook's, this innovative tray drying rack addresses the challenges presented by the Flex Tray and Hot/Cold Trays. By hanging the trays from slides the excess water drains off the trays and promotes air circulation for faster drying inside and out. And while this rack is easy-to-load, the trays can only be loaded in the direction that will tilt them forward to promote drainage so it's easy for inmates to use.

- All welded aluminum construction
- Angled trays slides hold trays from top rather than shelves that hold trays, ensuring water drains from the trays
- Easy-to-load slides, ensure that trays are loaded in the proper direction
- 1-½" x 1-¾" exterior tube frame
- Back of rack includes Pan Stop of 1" tube, keeping trays in place on shelves
- Height allowance between top of tray slide and shelf below is 12"
- Angled tray slides are welded to top of 1-½" tube frame creating shelf that allows complete drainage
- Bottom of rack has .080" sheet to catch water with drain notch on one to ensure easy clean up and reduce risk from wet floor
- Four and five shelf models fit Flex 321 Tray and Flex 437 Tray
- Large 5" x 2" casters for easy maneuverability
- 1 year warranty against factory defects

8 QT COMMERCIAL SERIES STAND MIXER WITH BOWL GUARD

This is Kitchenaid's most powerful, efficient, longest-lasting Mixer. And it's quiet, too! Featuring a brushed stainless steel bowl with a commercial "J" style handle, a stainless steel flat beater, elliptical 11-wire whip, and dough hook, it easily handles recipes that require longer mixing, kneading, and whipping times.

- Large capacity 8 qt bowl with bowl-lift design
- Commercial attachment power hub
- Robust metal controls
- Speed control protection
- 500 watts delivering 1.3 HP high efficiency DC motor
- 120V
- 2 year replacement limited commercial warranty

Model#	Dimensions	Each
KA-KSMC895	14-½"D x 13-¼"W x 16-½"H	$749.98

Specify: Dark Pewter (DP), Onyx Black (OB), Empire Red (ER), or White (WH)

5 QUART MIXER

With three-speed transmission, large easy-to-read controls, and convenient hand lever to raise and lower the bowl, this may be the best countertop mixer out there. It includes a stainless steel bowl, flat beater, wire whip, and dough hook. In addition, you'll find:

- ⅛ HP Hobart fixed speed motor
- #10 taper attachment hub
- 120 / 61 / 1 phase
- One year warranty on parts and labor

17"H x 10-½"W x 9-¼"D

CUSTOMER REVIEW

"Finally bit the bullet and upgraded to this Hobart Mixer. Couldn't be happier! It kneads up wonderful batches of bread dough without complaint, rolls pasta (compatible with the KitchenAid attachments), makes sausage, whips eggs like a breeze of course..." - Pearl

GROEN NSF UL

ECLIPSE BRAISING PAN

This streamlined design combines performance, water resistance and ergonomics into one high performance braising pan.

- High performance: fast, high-capacity pan heats to 350°F in just 4 minutes
- Precision thermostat regulates temperature for accurate cooking
- Smooth-action, quick-tilting body will never jerk or halt when tilting pan -- only 23 turns for a full tilt
- Single control box is centrally located and easily accessible
- Improved counterbalanced cover hinge ensures easy operation and cleaning
- Increased pan size for true working capacity of 30 or 40 gallons
- Easy to reach right-, left-hand, or rear-mounted faucet
- Easy-to-clean, 3' radius rounded interiors -- no corners to clean
- Bullet feet can be field-retrofitted and are interchangeable with flanged feet or casters
- Strengthened cover hinges for increased durability and longer life

HERE'S HOW TO DESIGN YOUR IDEAL TRAY ASSEMBLY LINE

PROBLEM

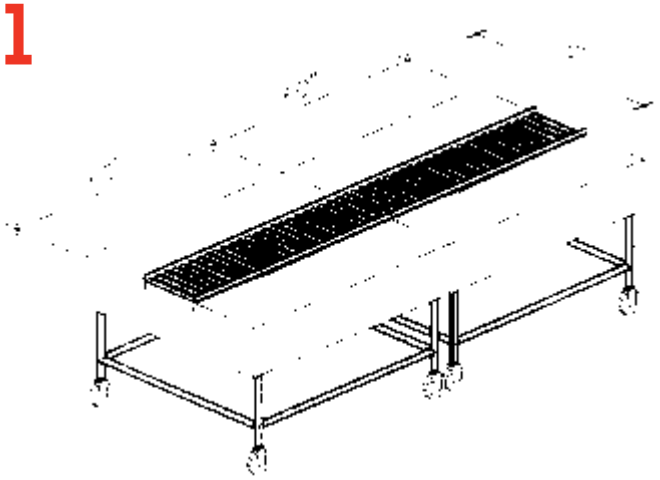

Standard tray lines offer too many opportunities for inmate mischief.

PROBLEM SOLVED

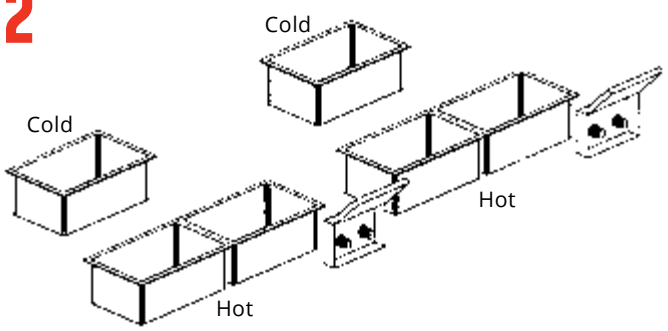

SOLUTION

The tray lines available on the general market aren't built to be operated by a staff that wants to break the legs, punch out the controls, turn over the tray line or destroy the rollers so they can make a weapon from the parts. And in a hospital cafeteria, that's okay, but in a jail, you need corner braces, cross channel supports and welded leg gussets to keep things intact. You need a recessed control panel with a locking cover, and a wide base so the line is too big to turn over easily. You also need one piece rollers that are easy to clean but don't come apart so an inmate can use the shaft as a weapon, and you get all this with the Cook's Correctional Tray Assembly Line, plus your time to deliver meals just got faster....problem solved!

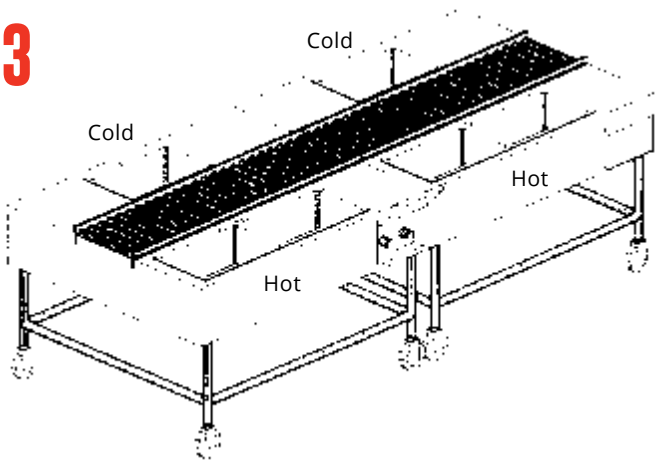

1

2

3

1 Determine the number of sections needed. Up to four sections can be connected.
Example: 2 sections

2 Determine the number of hot and cold wells needed.
Example: 4 hot wells, 2 cold wells.

3 Determine placement of wells.
Maximum of 2 wells per side on each section.

4 Determine the direction of the line.

5 Call for quote.

BEST PRACTICES FOR TRAY ASSEMBLY

Pre-portioning meals on insulated trays for delivery to pods or units is efficient and economical. Yet it's amazing how many tray assembly operations end up inefficient because of the order of foods on the line. Here are some helpful hints:

- Hot foods should go on trays last, not first.
- Minimize the distance food moves from well to tray.
- Keep the conveyor line moving fast to avoid for mischief.
- Allow 30" per worker for adequate shoulder space.
- Pitch the conveyor line ¼" per 1'0" from the head of the line to the end.
- Cover hot food after portioning as quickly as possible to retain heat.
- Since cold trays chill hot food fast, keep trays in traywashing or other warm area.
- Always strap together to retain temperature.

COOK'S BRAND

CORRECTIONAL TRAY ASSEMBLY LINE

Innovative Design
Design places workers closer to the line for increased speed and efficiency. Five foot sections can be easily connected to create 5', 10', 15' or 20' line as determined by your facilities needs. Gravity conveyor moves trays at about 17 to 20 trays per minute, providing for an hourly production of about 1,000+ trays.

Durable Construction
Heavy duty stainless steel construction with 14 gauge reinforced top, corner braces, cross channel support and welded leg gussets, you won't find a better built tray assembly line. And because we use a gravity conveyor, there are no belts or motors to break.

Proven Performance
With more than a hundred Cook's Correctional Tray Assembly Lines in operation in America today and no complaints, this product has proven its value to our customers. Call Cook's today to see if this is the right product for your operation.

SALVAJOR

TROUGH COLLECTOR

Ideal for high volume operations, the trough collector recirculates 70 GPM of water, propelling food waste down the length of a trough so that multiple staff or trustees can be scrapping into the trough at one time. Rather than grinding food waste or collecting every scrap of garbage in a trash can, soluble food waste is washed through the sewer while fibrous and non-soluble waste is held in the scrap basket until emptied. Trough collectors significantly reduce waste, saving you time, water and money.

- Ideal for keeping up with large conveyor or flight dish machine
- Recirculates water at 70 gallons per minute to propel food waste down the trough
- Consumes only 2 gallons of fresh water per minute
- Reduces food waste by up to 50% washing soluble food waste through the sewer
- 2-piece stainless steel tank, stainless steel adjustable legs and control panel
- Salvage basin and scrap basket are high impact polymer
- Specify voltage at time of quote/purchase
- Designed to work with fabricated trough (not provided) 3"d with a fall of at least 3/32" per foot

SHANK-FREE AND METAL-FREE

MADE FOR CORRECTIONS

SHANK-FREE MAINTENANCE PRODUCTS

Safety managers previously began replacing metal tools; used by inmates to make shanks, with hard plastic tools. They discovered that creative inmates were melting down the hard plastic and hand-crafting shanks. These new tools are made from a special rubbery plastic that virtually eliminates shanks. The unique polymer used will not melt or sharpen like other standard hard plastics and there is no metal in any of these tools. Inmates cannot form or re-form the plastic into a new shank or shank handle. Briarwood Products are made in the USA and currently used in correctional facilities throughout the world.

PROBLEM SOLVED

PROBLEM

Wire bindings create a security risk.

SOLUTION

Most people don't have to evaluate their purchases by how easily they can be taken apart and potentially used as weapons, but that's your filter and it's ours too. That's why we promote this broom. With the wire binding removed and string used in its place, you've got one less security risk in your kitchen....problem solved!

TERMS: Net due 30 days upon receipt of invoice. The above order (including any purchase order or PO) is made on behalf of, by, and for the governmental jurisdiction or company as shown in "Bill To" and/or "Send To" box above.

Prices All prices reflect customer's net price and do not include freight or taxes. Prices, colors, and specifications are subject to change without notice.

Terms Open account terms of net 30 days after shipment are extended to all state, county & city jails & prisons. Private sector facilities qualify for credit with a satisfactory rating by Dun & Bradstreet. Unlisted or unrated firms are asked to submit two trade references and name of bank.

Freight All items are FOB factory. Factory stock items will ship within 1 week. Custom orders generally take 4 to 6 weeks to ship. Items are shipped UPS or common carrier of our choice. Shipping, handling, insurance, & packing charges are added to invoice. If you request inside delivery, these charges, if any, will also be added to the invoice.

Damage Buyer should thoroughly inspect & count all items prior to accepting delivery. Any damage should be noted on freight bill of lading.

Returns All items to be returned must be authorized by Cook's before return. Some items are subject to a 20% to 50% restocking charge. Some custom items may not be returned. Call -866-613-2632 for assistance.

Warranty Any and all warranties are provided to the purchaser by the manufacturer. Please see our website (click Legal information) for complete warranty details.

UTILITY ORDER FORM

Thank you for purchasing your new kitchen equipment from Cook's. In order for us to better serve you, please complete this Utility Order Form and return it to us via fax at (800) 956-6822. This form helps us ensure that your new equipment will be ordered and built to your exact utility specifications. As soon as we receive this information, we can release your order to the factory for manufacturing.

Cook's Sales Order Number_____ **Equipment Model #**_____

The utility(s) checked below are available at this facility and intended for the equipment referenced above.

Check all that apply to this equipment order.

Gas

☐ Natural gas

☐ Propane gas

☐ Check here if your facility's elevation is more than 2000 ft above sea level.

Electric ***(Check one box only - applicable to above ordered equipment)***

Amperage and plug type vary according to voltage. Please review the equipment cut sheet for exact product requirements and check the box below which reflects the appropriate specification available in your kitchen. ***If not quoted as such, 3-phase up charge may apply.***

☐ 120/60/1 ☐ 208/60/3 ☐ 240/60/3 ☐ Other_____

☐ 208/60/1 ☐ 240/60/1 ☐ 480/60/3

Steam

Required psi and steam flow rate vary, please check the manufacturer's requirement carefully.

☐ Clean steam (must meet FDA guidelines) ☐ Dirty steam (not approved for food contact)

Required

Will the equipment fit through all of the doors from receiving area (dock) to the kitchen?

☐ Yes – all doors, security vestibules & hallways have been checked for adequate size.

Delivery options (Check all that apply)

☐ Dock delivery; forklift available / on premise (standard delivery – no additional charge.)

Residential delivery requested. **Residential addresses are an additional $96.**

☐ No dock available - delivery to ground level with a lift gate truck required.*
***Lift gate service is non-standard and will be an additional cost. ($100)**

☐ Inside delivery required (product(s) taken inside building by deliverer.)*
***Inside delivery service is non-standard and will be at additional cost.**
***Inside delivery does not include lift gate service.**

Note: Equipment returns may be subject to a manufacturer's restocking charge of 15-50%. Please review your order carefully.

Additional charge may be applied to changes made to equipment after released to manufacturing.

Please print your name: _____

Signature_____ Title_____ Date _____

Thank you! We look forward to helping you with your next order.

Phone 866-613-2632 Fax 800-956-6822

DEFINITIONS AND TERMS

Electrical Volts, Cycles, Phase(s) Amps and Amperes

Hertz/Cycles:

USA 60 Hertz, all other countries 50 Hertz.
The two levels of Hertz/Cycles are not interchangeable.

Phases: Single Phase and Three Phase

Single Phase

110 volts, 115v, 120v and 208v, 220v, 240 volts

Common voltages are 110v, 115v, 120v typical in homes or offices; used interchangeably when labeled 110, 115 or 120 volt. Single phase electricity uses a live, neutral and earth (or ground) wire...Also in 208v, 220v or 240v single phase.

Note: 208v equipment generally does not work with 220 or 240v.

Three Phase

208 volts, 220v, 240v, 277v and 480 volts

Common voltages are 208v, 220v, 240v, 277v and 280 volts (all three phase) used in institutions. Always suggest 480 volts when the facility has the electrical capability to provide it - it is in the operators long term best interest. Three phase electricity involves the use of three live wires plus an earth (or ground) wire.

Note: 208v equipment generally does not work with 220 or 240v.

Amperes, Amps

A piece of equipment that requires 70 amps can be connected to a 100 amp circuit; but a piece of equipment requiring 100 amps should not be connected to an 80 amp circuit. 'Initial Draw' refers to the amount of amps required to start a motor. When matching a piece of equipment to a circuit, the circuit should always be equipped with a breaker large enough and a circuit capacity that can handle the initial draw. The voltage does not change.

To Our Customers:
Throughout this catalog you are seeing a new icon and warning label:

For California Residents
WARNING: Cancer & Reproductive Harm
www.P65Warnings.ca.gov
See p 184 for details

California's Proposition 65 entitles California consumers to specific warnings on products that contain chemicals known to the state of California to cause cancer and birth defects or other reproductive harm if those products expose consumers to such chemicals above certain threshold levels. We care about your safety, the safety of your staff and of those in your care. Please review the following information for the items that are listed in our catalog and carry the Proposition 65 Waring notice. These notices are organized by product type and/or product material.

Polycarbonate Meal Trays/lids, Tumblers, Mugs, other Meal Serving Products and Kitchen Utensils
California requires the following notice:
WARNING: Polycarbonate products; including meal trays/lids, tumblers, mugs or portion utensils, contain bisphenol A (BPA), a chemical known to the State of California to cause harm to the female reproductive system. Users can be exposed to BPA when consuming foods or beverages served in these containers.

Heavy Duty Equipment with electrical cord, such as the Cook's Brand Correctional Tray Assembly Line California requires the following notice:
WARNING: The wires of this product contain chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. Wash hands after handling.

Flexible Vinyl or PVC products which may be included in component parts within an item
California requires the following notice:
WARNING: This product can expose you to chemicals including diisononyl phthalate (DINP), which are known to the State of California to cause cancer, birth defects, or other reproductive harm.

Stainless Steel, plastic, and brass or mixed materials including products such as the Cook's Brand Kettle Tools, Cutlery, Dead Man Box, Tool Locker, Correctional Tray Assembly Line, Meal Delivery Carts; Metal or Plastic, Cake Marker, the Knife Leash Kit, Adhesive Labels, Nylon Utensils
California requires the following notice:
WARNING: These products contain chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. The following chemicals may be found within the above listed products in their components listed below:

Lead found in various metals including aluminum and stainless steel, the oils & fluids found in casters, insulation, and vinyl/pvc materials
Chromium-hexavalent found in stainless steel
DEHP found in adhesives, vinyl/pvc, and various metals
TDCPP, TDBPP, TCEP found in polyurethane foam or other filing materials
BBP found in vinyl/PVC

For more information go to:
www.P65Warnings.ca.gov/BPA

It is important to understand that we are required by law to place these labels on products that include various unsafe chemicals in compliance with California law. There are products within this catalog which may display these warnings even though the levels of these regulated chemicals are considered within safe parameters; only the manufacturer of these items has not had outside testing to validate compliance, in which case they have chosen to instead display the warning label.

FOOD SAFETY HANDLING GUIDE

RECEIVING

Before accepting deliveries, make sure the temperature is within prescribed limits. Check both surface and interior temperatures: use either a Instant Read or a Pocket Digital Thermometer for a quick interior check and a Infrared Thermometer for surface temperatures.

- Refrigerated foods – no higher than 41° F
- Frozen foods – No higher than 0° F
- Discard dry goods if there is any dampness, discoloration or if packaging is damaged.

Remember: Always refuse foods that show any signs of spoilage!

STORING

All foods must be properly stored to minimize the risk of bacterial growth or contamination.

- Refrigerated foods must be stored at 41° F or lower
- Frozen foods need an air temperature below 0° F — use two freezer thermometers – one at the warmest point, the other at the coldest – to monitor air temperature.
- Dry stored foods should be kept at 50° F in a well-lit, ventilated room with a maximum of 60% relative humidity. Use a Wall Thermometer of Remote Sensor Thermometer to monitor storage room temperatures and humidity levels.

Remember: Check storage temperatures at least twice each day.

PREPARING / COOKING

Foodborne pathogens are killed by safe cooking temperatures. Use a Deep Fry Thermometer to check deepfrying oil temperatures to prevent cooking the surface of foods too quickly. Use an infrared Thermometer to ensure grills, fryers and ovens maintain the right temperature for uniform cooking and use Pocket Digitals or Thermocouple Thermometers to ensure that 1999 FDA Guidelines for safe internal temperatures are consistently met.

SERVING / HOLDING

Hold foods out of the Danger Zone – hot foods above 140° F and cold foods below 41° F – to inhibit bacteria. Always use thermometers – either a Hot/Cold holding Cabinet Thermometer or Hand-held Thermocouple Thermometer with an Air Probe – to check air temperature in holding cabinets and under heat lamp warmers.

Remember: Built-in Thermostats may be misleading because they only measure air temperature immediately adjacent to sensors, which may not be uniform throughout the holding area.

COOLING

After cooking, chill foods – especially meats – as rapidly as possible to minimize their time in the danger zone and limit bacterial growth. Chill from 140° F to 70° F within 2 hours, then from 70° F to 41° F within 4 hours. Use a Pocket Thermometer, Pocket Digital Thermometer, or a Hand – held Thermocouple Thermometer with Interchangeable Probes.

Remember: The larger the surface area, the faster the food will cool – Cut roasts into smaller portions and distribute liquids among several smaller pans to speed chill-time.

REHEATING

Some bacteria survive cooking and multiply to dangerous levels during chill-down. Food must be reheated to an internal temperature of 165° F to eliminate new pathogens. Use an Instant Read or Hand – held Thermocouple Thermometer to ensure all foods are reheated adequately.

Remember: The Infrared Thermometer is ideal for quickly and inconspicuously checking the surface temperature in holding cabinets, on salad bars and steam tables.

FOOD HOLDING TEMPERATURE GUIDE

BASIC TEMPERATURE GUIDE

140° F	Steam Tables (minimum temperature)
33-41°F	Refrigerator temperature
0° F	Frozn foods
-20° F	Frozn foods for extended time (up to1 year)

BACTERIAL CONTROL TABLE

212° F Boiling point of water (at sea level)

165-212°F Cooking temperature destroys most bacteria. Required time to kill bacteria decreases as temperature increases.

140-165°F Warming temperatures prevent growth but allow survival of some bacteria.

120-140°F Some bacterial growth may occur. Large percentage of bacteria survive.

SANITATION TEMPERATURE GUIDE

180-212°F Sanitation of Dishes (min.180° F for 30 seconds)

140°F Wash cycle of dish machine

120°F Hand dishwashing

60-120°F Incubation zone. Temperatures in this zone allow rapid growth of bacteria and production of toxins by some bacteria. Foods should move through this temperature very quickly to avoid microbial spoilage.

40-60°F Some growth of food poisoning bacteria may occur.

32-40°F Cold temperatures permit some slow growing bacteria to cause spoilage

0-32° F Freezing temperatures stop growth of bacteria, however, bacteria may survive.

EQUIPMENT SIZING GUIDE

OVENS

Number of Inmates	100	200	300	500	750	1000	1300	1600	2000
4 Burner Range with Oven Base	2	1	1

bu.	bushel
oz	ounce or ounces
lb.	pound or pounds
sq.	square
min.	minute or minutes
hr.	hour or hours
mod.	moderate
dz.	dozn
E.P.	edible portion
A.P.	as purchased

STANDARD PACKING PER BOX: FRESH FRUIT

Cherries	20 to 50 per lug
Grapefruit	18, 23, 27, 32 or 40 per crate
Pineapple	9,12, 15, 18 or 24 per crate
Melons	
Honeydew	5, 6, 8 or 9 per crate
Cantaloupe	20, 24, 32, 36 or 48 per crate
Peaches	1/2 bushel basket, 60 or 72 to a flat (25 lbs)
Oranges	
Florida	88, 100 or 125 per box
California	56, 72, 80 or 100 per box
Watermelon	18 to 32 lbs. each
Strawberries	12 pints per flat
Raspberries	12 pints per flat
Bananas	6 lbs. per hand, 27, 36 or 45 per crate
Lemons	95, 115, 140, 165, 200, or 230 per 4/5 bushel
Plums	6 lbs. per till, 4 tills per carton

COUNTING

1 dozn = 12 units

12 dozn = 1 gross= 144 units

12 gross = 1 great gross= 1728 units

DRY CAPACITY

1 pint	= 33.6 cu. in.	= 0.5506 liters

FRESH VEGETABLES

Lettuce	24 heads per box
Tomatoes	20 lbs. per flat 40 to 80 lbs. per lug 6 lb. til: 12-24 tomatoes
String Beans	28 lbs. per bushel
Spinach	20 lbs. per bushel
Washed Spinach	8 oz per bag 16-20 bags per case
Broccoli	12 bunches per case
Artichokes	24 to 48 heads per box
Carrots	50 lbs. per bushel
Onions	50 lbs. per bushel
Potatoes	50 lbs. per bag
Peeled Potatoes	30 lbs. per box
Peeled Onions	20-25 lbs. per box
Asparagus	30 lbs. per crate
Cauliflower	50 lbs. per box
Beets with tops	50 lbs. per bag
Mushrooms	3 lbs. per basket
Leeks	1/2 bushel basket
Chicory, Escarole	16-20 heads per case
Romaine	
Radishes	30 bunches per box
Watercress	25 bunches per box
Celery	24, 30, 36 or 48 heads per crate
Eggs	30 dz. per crate

COOK'S

DESIGN, INSTALLATION & CONSTRUCTION SERVICE

NO MATTER THE SIZE OF THE JOB, COOK'S HAS YOU COVERED.
THERE ARE THREE WAYS WE CAN HELP.

NO ONE UNDERSTANDS CORRECTIONAL FOODSERVICE EQUIPMENT BETTER THAN COOK'S.

1. Already have a project in progress?

Cook's can provide you with a Consult. We will audit a proposed design and equipment specification, where we:

a. Review your current design/CAD and provide recommendations with an eye for corrections.

b. All proposed equipment will be assessed for size, durability and security and we will recommend alternatives where needed.

c. You will have the option to stop at this point or continue with Cook's as your design & equipment partner ensuring you get the best results for corrections.

2. Considering a Renovation?

Cook's can assist you with location specific projects like a dishroom, ODR, cooking line or walk-in solution.

a. Cook's will initiate a conference call to all stakeholders to discuss the scope and goals of your renovation.

b. We will follow up with an on-site evaluation leading to CAD drawings, an equipment package and submittals.

c. We finish the renovation with installation, equipment start-up and training.

3. Looking for a Turn-Key Solution?

Cook's can provide you with full consultation, design, equipment specification, construction documents, installation, start-up and training.

a. Cook's will be there every step of the way from doing a site review with an operation analysis through start-up and training.

b. We will be immersed in all stages during the project as a single point of contact for all stake holders.

c. You can count on Cook's after completion to be there to assist you with equipment start-up, training and warranty issues.

CALL US AT 800-956-5571 TO GET STARTED AND PUT OUR EXPERTISE TO WORK FOR YOU.
